- Benefits -

- Speed and accuracy
- Non-invasive and painless
- Simple and convenient
- Cost Effective

Clinic Timing:

Mor. 7.30 AM to 12.30 PM
Eve. 5PM to 8 PM

Monday Closed

Kratin Wellness Clinic

Behind Purushottam Bazar, Beltarodi Road,
Manish Nagar, Nagpur

For Appointment Call on :

M: 7057314702/9881727702
LL: 0712- 6601279

Quantum Resonance Magnetic Analyser

(Bio Resonance Scanning)

Quantum Resonance Magnetic Analyser is a health instrument to determine, measure and analyse health condition through the signal of electromagnetic waves emitted from the cells of human body which represent the specific conditions of good health, sub health and disease.

How does it work

Simply by holding the QRMA sensor in your palm, health data will be collected with in 59 seconds from various body systems.

Principle of Analysis

Human body is an aggregate of numerous cells, which continuously grow, develop, split, regenerate and die. By splitting up, cells renew themselves. For adult people, about 25 million cells are splitting up every second and blood cells are constantly renewing at a rate of about 100 million per minute.

In the process of cellular split-up and renewal, the charged bodies of nucleus and extra nuclear electrons of a cell, moving and changing ceaselessly at a high speed as well, emit electromagnetic waves without interruption. The signals of electromagnetic waves emitted by human bodies represent the specific condition of human body and therefore, different signals of electromagnetic waves will be emitted by the conditions of good health, sub-health, diseases, etc.

The conditions of life can be analyzed if such specific electromagnetic wave signals can be analyzed.

The quantum resonant magnetic analyzer is a new instrument to analyze such phenomenon. The weak magnetic frequency and energy of human body are collected by holding the sensor, and after amplification by the instrument and treatment by the built-in micro-processor, the data are compared with the standard quantum resonant spectrum of diseases, nutrition and other indicators incorporated in the instrument to judge whether the sample waveforms are irregular using the Fourier approach.

Analysis Items

The method of quantum resonant magnetic analysis is an emerging rapid, accurate and non-invasive spectral testing method suitable for comparison of curative effects of treatment/medicine and check of sub-health conditions.

The main analysis items are over 30, including cardiovascular and cerebrovascular condition, bone mineral density, trace elements, blood lead, rheumatism, lung and respiratory tract, nephropathy, blood sugar, stomach and intestines, liver and gall, cranial nerves, gynaecology, prostate, bone disease, the trace elements of selenium, iron, zinc and calcium, etc.

Prediction without symptoms:

With only 10 or so cells of pathological change, the analyser can capture the pathological changes of cells and give indications of the precursor of disease. By taking health-care actions at this moment, you may be enabled to effectively prevent the various chronic diseases.

Benefits:

Stay Healthy
Be in Shape
Eat Well
Feel Good

Speed and accuracy:

For general health assessment, multiple indicators of your health can be obtained within minutes without the need to expensive work ups as well as saving your time and energy.

The database of the analysis system has been established with scientific method, strict health statistic treatment and demonstration of a large number of clinical cases, leading thus to a high analysis accuracy.

Non-invasive and painless:

The analysis will tell you the condition of your health without hem analysis or radiography.

Simple and convenient:

It is not only easy in operation, cost effective compared to existing system but also provides immediate results . Health check can be performed in any place and at any time, saving the time of patients.

To know more about the process or for health check up and for your Health Management Plan
